The 6-Pack Colorful Therapressure brush set is a touchscreen brush designed by Patricia Wilbarger. This oval brush is easier to use than a conventional touchscreen brush in that it comes with an attached handle and has a more ergonomic design that makes it fit comfortably in the hand. According to Patricia Wilbarger, the high density of bristles makes it an ideal brush for the body. For specific instructions on cleansing therapy, it is best to talk to a professional therapist or therapist trained in the Wilbarger Protocol. This oval brush is easier to use than a conventional touchscreen brush in that it comes with an attached handle and has a more ergonomic design, making it conveniently placed in your hand. Vibrant colors make these brushes fun and can be used to train children of color while brushed by a professional therapist to make sure they are the most effective high density bristles. Make it the perfect brush for body. Six brushes make sure you have enough for home, office, clinic, school and travel. Afbeelding niet beschikbaar voor kleur: The image is not available for TheLor.
